7 January 2014

## Land Values issued for Young

NSW Valuer General Philip Western today said 6,656 Notices of Valuation have been issued to landholders in the Young local government area (LGA).

Mr Western said that Notices of Valuation show the land value of a property based on property market conditions as at 1 July 2013. Land value is the value of the land only and does not include the value of the home or other improvements on the land.

“Land values are one factor considered by councils when determining rates. The Notice of Valuation gives landholders the opportunity to consider their land value before it is used by council,” Mr Western said.

“Land values are fixed for rating until new values are issued to council, which usually occurs every three to four years. Landholders in Young LGA were previously issued with a Notice of Valuation showing their property’s land value as at 1 July 2010.

“The total land value of the Young LGA was approximately \$1 billion as at 1 July 2013. This is an overall increase from the total land value of approximately \$956 million determined as at 1 July 2010.

“Changes in land values don’t necessarily lead to similar changes in rates. Each council develops a revenue policy to use in the calculation of rates and charges to fund services for the community.”

To find out more about rating visit the Division of Local Government website [www.dlg.nsw.gov.au](http://www.dlg.nsw.gov.au).

Mr Western said valuers take a number of factors into consideration when determining land values.

“Property sales are the most important factor considered when determining land values. Real estate analysis in the Young LGA has been comprehensive during the course of the 2013 valuation program with 103 residential, three commercial, four industrial and 77 rural sales analysed,” Mr Western said.

“In the three year period since landholders in Young LGA were issued with Notices of Valuation the value of residential, rural residential and village land has, overall, shown a slight increase.

“Rural land in the western area of the shire and land in the villages of Bendick Murrell and Koorawatha showed a moderate increase in value, while the value of rural grazing land
