### Land values issued for Blayney Local Government Area

NSW Valuer General Philip Western today said landowners and rate paying lessees of 3,868 properties in the Blayney local government area (LGA) have been issued with a Notice of Valuation showing the land value of their property as at 1 July 2011.

Mr Western said landowners and rate paying lessees receive a Notice of Valuation when new land values have been issued to their council to use in the determination of rates.

“These land values are fixed for rating until new values are issued to council,” he said.

“Landowners in Blayney LGA were last issued with a Notice of Valuation showing their property’s land value as at 1 July 2007.

“The total land value of the Blayney LGA as at 1 July 2011 was approximately \$746 million. This is an overall decrease from the total land value of \$751 million determined as at 1 July 2007,” Mr Western said.

“Property sales are the most important factor considered by valuers when determining land values.

“Real estate analysis in the Blayney LGA has been comprehensive during the course of the 2011 valuation program, with 68 residential, 6 commercial, 5 industrial and 52 rural sales analysed,” he said.

Over the four-year period since landowners in Blayney LGA were issued with Notices of Valuation, the value of residential and commercial land has generally remained steady.

The value of industrial land has generally shown a moderate increase, primarily due to demand from mining related industries associated with the nearby Cadia mine. Land values for land in the Blayney industrial estate have shown a slight increase over the four-year period.

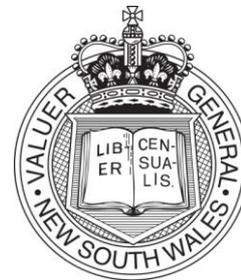

Rural land values have generally shown a moderate decrease over the period. The land value of higher valued rural residential land has generally experienced a slight decrease since 1 July 2007. However, land values for other rural residential land has generally shown a moderate increase in value.

Village land values have generally remained steady, with the exception of village land in Carcoar, which decreased in value, and Millthorpe, where land values showed a slight increase in value.
