### Land values issued for Gloucester Local Government Area

NSW Valuer General Philip Western today said landowners and rate paying lessees of 3,247 properties in the Gloucester local government area (LGA) have been issued with a Notice of Valuation showing the land value of their property as at 1 July 2011.

Mr Western said landowners and rate paying lessees receive a Notice of Valuation when new land values have been issued to their council to use in the determination of rates.

“These land values are fixed for rating until new values are issued to council,” he said.

“Landowners in Gloucester LGA were last issued with a Notice of Valuation showing their property’s land value as at 1 July 2008.”

“The total land value of the Gloucester LGA as at 1 July 2011 was approximately \$744 million. This is an overall increase from the total land value of \$711 million determined as at 1 July 2008,” Mr Western said.

“Property sales are the most important factor considered by valuers when determining land values.

“Real estate analysis in the Gloucester LGA has been comprehensive during the course of the 2011 valuation program, with 40 residential, 4 commercial, 5 industrial and 33 rural sales analysed,” he said.

Over the three-year period since landowners in Gloucester LGA were issued with Notices of Valuation, the value of residential and industrial land has generally shown a moderate increase.

The value of commercial, rural and village land has generally remained steady, with the exception of first class rural river frontage properties and some village land, which has shown a slight increase in value.

The value of rural residential land has generally remained steady.

Typical residential land values were:

- 813 square metres at Carter Crescent, Gloucester valued at \$80,000
- 949 square metres at Cowper Street, Gloucester valued at \$85,000
- 1,012 square metres at Denison Street, Gloucester valued at \$80,000
- 714 square metres at Rye Crescent, Gloucester valued at \$74,000.
