

# Office of the New South Wales Valuer General MEDIA RELEASE

31 January 2014

## Land Values issued for Broken Hill

NSW Valuer General Philip Western today said 10,536 Notices of Valuation have been issued to landholders in the Broken Hill local government area (LGA).

Mr Western said that Notices of Valuation show the land value of a property based on property market conditions as at 1 July 2013. Land value is the value of the land only and does not include the value of the home or other improvements on the land.

“Land values are one factor considered by councils when determining rates. The Notice of Valuation gives landholders the opportunity to consider their land value before it is used by council,” Mr Western said.

“Land values are fixed for rating until new values are issued to council, which usually occurs every three to four years. Landholders in Broken Hill LGA were previously issued with a Notice of Valuation showing their property’s land value as at 1 July 2010.

“The total land value of the Broken Hill LGA was approximately \$322 million as at 1 July 2013. This is an overall decrease from the total land value of approximately \$346 million determined as at 1 July 2010.

“Easing in the local economy has contributed to the overall decrease in land values for Broken Hill.

“Changes in land values don’t necessarily lead to similar changes in rates. Each council develops a revenue policy to use in the calculation of rates and charges to fund services for the community.”

To find out more about rating visit the Division of Local Government website [www.dlg.nsw.gov.au](http://www.dlg.nsw.gov.au).

Mr Western said valuers take a number of factors into consideration when determining land values.

“Property sales are the most important factor considered when determining land values. Real estate analysis in the Broken Hill LGA has been comprehensive during the course of the 2013 valuation program with 73 residential, 17 commercial, seven industrial and one rural sale analysed,” Mr Western said.

“In the three year period since landholders in the Broken Hill LGA were issued with Notices of Valuation, the overall land values of commercial property across the Broken Hill LGA have remained steady. Land values in the West Side Plaza precinct have shown a slight increase while values in the Alma commercial area showed a moderate decrease.

“There has been a moderate increase in industrial land values since Notices of Valuation were last issued. Demand has been consistent with a limited supply of vacant land available.

“Some properties which have changed zoning due to the extension of the Broken Hill industrial area, under the new local environmental plan, have shown moderate increases in values.

“Rural residential land values have generally remained steady across the Broken Hill LGA, with some slight increases in value due to the new local environmental plan.
