## **Land Values Issued For Lithgow**

NSW Valuer General Philip Western today said 11,638 Notices of Valuation have been issued to landholders in the Lithgow local government area (LGA).

Mr Western said that Notices of Valuation show the land value of a property based on property market conditions as at 1 July 2013. Land value is the value of the land only and does not include the value of the home or other improvements on the land.

“Land values are one factor considered by councils when determining rates. The Notice of Valuation gives landholders the opportunity to consider their land value before it is used by council,” Mr Western said.

“Land values are fixed for rating until new values are issued to council, which usually occurs every three to four years. Landholders in Lithgow LGA were previously issued with a Notice of Valuation showing their property’s land value as at 1 July 2010.

“The total land value of the Lithgow LGA was approximately \$1.51 billion as at 1 July 2013. This is an overall decrease from the total land value of approximately \$1.55 billion determined as at 1 July 2010.

“Changes in land values don’t necessarily lead to similar changes in rates. Each council develops a revenue policy to use in the calculation of rates and charges to fund services for the community.”

Mr Western said valuers take a number of factors into consideration when determining land values.

“Property sales are the most important factor considered when determining land values. Real estate analysis in the Lithgow LGA has been comprehensive during the course of the 2013 valuation program with 276 residential, 10 commercial and 126 rural sales analysed,” Mr Western said.

“In the three year period since landholders in Lithgow LGA were issued with Notices of Valuation the value of residential land generally remained steady, with the exception of residential land in Wallerawang, which showed a slight increase in value.

“Commercial and industrial land values generally remained steady, with commercial land at Portland showing a slight increase in value.
