

Office of the New South Wales Valuer General MEDIA RELEASE

Date: 10 January 2014

Land Values Issued For Lockhart

NSW Valuer General Philip Western today said 2,593 Notices of Valuation have been issued to landholders in the Lockhart local government area (LGA).

Mr Western said that Notices of Valuation show the land value of a property based on property market conditions as at 1 July 2013. Land value is the value of the land only and does not include the value of the home or other improvements on the land.

“Land values are one factor considered by councils when determining rates. The Notice of Valuation gives landholders the opportunity to consider their land value before it is used by council,” Mr Western said.

“Land values are fixed for rating until new values are issued to council, which usually occurs every three to four years. Landholders in Lockhart LGA were previously issued with a Notice of Valuation showing their property’s land value as at 1 July 2010.

“The total land value of the Lockhart LGA was approximately \$629 million as at 1 July 2013. This is an overall decrease from the total land value of approximately \$637 million determined as at 1 July 2010.

“Changes in land values don’t necessarily lead to similar changes in rates. Each council develops a revenue policy to use in the calculation of rates and charges to fund services for the community.”

To find out more about rating visit the Division of Local Government website www.dlg.nsw.gov.au.

Mr Western said valuers take a number of factors into consideration when determining land values.

“Property sales are the most important factor considered when determining land values. Real estate analysis in the Lockhart LGA has been comprehensive during the course of the 2013 valuation program with 45 residential, three commercial, three industrial and 21 rural sales analysed,” Mr Western said.

“In the three year period since landholders in Lockhart LGA were issued with Notices of Valuation the value of residential land in the town of Lockhart has generally shown a slight increase, however, some residential land south of the railway line, has shown a strong increase in value.

MEDIA RELEASE

“Residential land in The Rock has generally remained steady, with some larger residential properties south of the railway line showing a slight decrease, and some lower lying properties showing a moderate decrease in value.

“Commercial, rural residential and hobby farm land has generally shown a slight increase in value, with the exception of commercial land in The Rock, which has remained steady.

“Industrial and rural land values have generally remained steady since 1 July 2010, with some primary production properties in the southern mixed farming areas of the shire adjoining Greater Hume showing a slight decrease in value.

“The value of village land has varied. Land in the village of Yerong Creek has generally remained steady, while village land in Pleasant Hills showed a slight increase. Land in the smaller villages of Milbulong and Tootool, however, has shown a strong increase in value.”

Typical residential land values were:

- 1,012 square metres at Hebden Street, Lockhart valued at \$22,600
