

Office of the New South Wales Valuer General MEDIA RELEASE

Date: 22 January 2014

Land Values Issued For Armidale Dumaresq

NSW Valuer General Philip Western today said 10,134 Notices of Valuation have been issued to landholders in the Armidale Dumaresq local government area (LGA).

Mr Western said that Notices of Valuation show the land value of a property based on property market conditions as at 1 July 2013. Land value is the value of the land only and does not include the value of the home or other improvements on the land.

“Land values are one factor considered by councils when determining rates. The Notice of Valuation gives landholders the opportunity to consider their land value before it is used by council,” Mr Western said.

“Land values are fixed for rating until new values are issued to council, which usually occurs every three to four years. Landholders in Armidale Dumaresq LGA were previously issued with a Notice of Valuation showing their property’s land value as at 1 July 2010.

“The total land value of the Armidale Dumaresq LGA was approximately \$2.02 billion as at 1 July 2013. This is an overall increase from the total land value of approximately \$1.91 billion determined as at 1 July 2010.

“Changes in land values don’t necessarily lead to similar changes in rates. Each council develops a revenue policy to use in the calculation of rates and charges to fund services for the community.”

To find out more about rating visit the Division of Local Government website www.dlg.nsw.gov.au.

Mr Western said valuers take a number of factors into consideration when determining land values.

“Property sales are the most important factor considered when determining land values. Real estate analysis in the Armidale Dumaresq LGA has been comprehensive during the course of the 2013 valuation program with 251 residential, eight commercial, five industrial and 47 rural sales analysed,” Mr Western said.

“In the three year period since landholders in Armidale Dumaresq LGA were issued with Notices of Valuation, the value of residential has generally shown a moderate increase. Large lot residential land has shown a slight decrease in value.

“The value of industrial land has shown a slight increase since 1 July 2010, mainly due to the shortage of available industrial land.
