### **Land values issued for Mid Western Regional Local Government Area**

NSW Valuer General Philip Western today said landowners and rate paying lessees of 12,824 properties in the Mid Western Regional local government area (LGA) have been issued with a Notice of Valuation showing the land value of their property as at 1 July 2011.

Mr Western said landowners and rate paying lessees receive a Notice of Valuation when new land values have been issued to their council to use in the determination of rates.

“These land values are fixed for rating until new values are issued to council,” he said.

“Landowners in Mid Western Regional LGA were last issued with a Notice of Valuation showing their property’s land value as at 1 July 2007.

“The total land value of the Mid Western Regional LGA as at 1 July 2011 was approximately \$2.066 billion. This is an overall increase from the total land value of \$1.944 billion determined as at 1 July 2007,” Mr Western said.

“Property sales are the most important factor considered by valuers when determining land values.

“Real estate analysis in the Mid Western Regional LGA has been comprehensive during the course of the 2011 valuation program, with 110 residential, 7 commercial, 6 industrial and 163 rural sales analysed,” he said.

Over the four-year period since landowners in Mid Western Regional LGA were issued with Notices of Valuation, the value of residential land has generally shown a slight decrease.

Residential land in Rylstone and Kandos, however, has remained steady, while residential land in Gulgong has shown a slight increase in value.

The value of commercial land has generally shown a slight decrease, while industrial land values have generally shown moderate increase mainly due to demand from the mining industry.

Rural land values have generally remained steady, with larger rural holdings showing a slight increase in value.
