Land Values issued for Gosford

NSW Valuer General Philip Western today said landowners and rate paying lessees of approximately 63,292 properties in the Gosford local government area (LGA) have been issued with a Notice of Valuation showing the land value of their property based on property market conditions as at 1 July 2012.

Mr Western said landowners and rate paying lessees are issued with a Notice of Valuation when new land values have been issued to their council to use in the determination of rates.

“These land values are fixed for rating until new values are issued to council, which usually occurs every three to four years,” he said.

“Landowners in Gosford LGA were last issued with a Notice of Valuation showing their property’s land value as at 1 July 2009.

“The total land value of the Gosford LGA as at 1 July 2012 was approximately $19.66 billion. This is an overall decrease from the total land value of $20.88 billion determined as at 1 July 2009,” Mr Western said.

“Property sales are the most important factor considered by valuers when determining land values.

“Real estate analysis in the Gosford LGA has been comprehensive during the course of the 2012 valuation program with 720 residential, 50 commercial, 30 industrial and 120 rural sales analysed,” he said.

Over the three year period since landowners in Gosford LGA were issued with Notices of Valuation the value of residential land generally showed a slight to moderate decrease. Residential land in areas such as Avoca Beach, Copacabana, Gosford, MacMasters Beach, Koolewong and Davistown, however, showed a slight to moderate increase in value. Beach front properties in North Avoca showed a slight increase in value, while beach front properties at Avoca Beach showed a slight decrease.

The value of commercial land generally showed a slight decrease, with the exception of the prime suburb of Erina, which showed slight to strong decreases in value, and commercial land values in Terrigal which showed a slight increase. Commercial land values in Gosford and Woy Woy showed a range of changes, from slight increase to slight decrease, while most of the commercial land in Ettalong Beach showed a moderate increase.
Industrial land in the Gosford LGA generally showed a slight decrease in value, with the exception of land in North Gosford, which remained steady or showed a slight increase in value.

The value of coastal rural residential land has varied, with some properties showing a moderate increase and others showing a moderate decrease. Rural residential land in the hinterland has generally shown a slight to moderate decrease, with the more rugged and less cleared sites showing a stronger than average decrease. Hinterland properties in the more prime locations showed a slight increase in value.

Typical residential land values as at 1 July 2012 were:

- 670 square metres at Amethyst Avenue, Pearl Beach valued at $513,000
- 727 square metres at Avoca Drive, Avoca Beach valued at $2,730,000
